SKILLS

EDUCATION

University of Denver 2018
Denver, CO
Full Stack Coding Bootcamp

Syracuse University 2013
Syracuse, NY
B. S. Biology / Pre-Med

I am a Front End Developer with the experience and tools to work across design and tech teams. Whether turning user-driven wire-frames into code, working directly with designers to create intuitive web applications, or gathering business requirements and documentation for new technologies, I am an adaptable design enthusiast with development expertise.

Work

Influence Technologies

2018 – 2019

- Managed and updated micro-marketing sites (experiences) for organizations like ASU, Starbucks, and Good Sam within an AngularJS (1.5) framework.
- Created and maintained email templates using Zurb's Foundation for Emails and tested them using Litmus Email Testing.
- Developed experiences using Influence's open-source library, iVXjs, and style templates with LESS.
- Gathered business requirements, writing tickets with acceptance criteria, and working on documentation for our products and the company's open-source library.
- Participating in design sessions, sprint grooming and tasking sessions, and sprint retrospectives where I was a voice in improving our workflow.

Freelance Web Development

2017 – present

- Build Custom Websites From Scratch
- Maintain Responsive Communication With Client
- Utilize Platforms To Meet Clients' Needs:
 - Squarespace
 - Wordpress
- Generate logos and page elements with Adobe Illustrator and Photoshop

Modern in Denver Magazine

2015 – 2018

- Created and edited content for digital articles in wordpress, shot and edited photography for web & newsletters, scheduled social media content & advertising, email newsletters (MailChimp), copy editor for web, event coordination, promotion and operations
